Experienced Hotel Supervisor, effective leadership to the dynamic world of hospitality. Responsible for daily operations, cultivating a positive team spirit, and guaranteeing unforgettable guest experiences.

PROJECTS

SPLIT BILL APP
HTML, CSS, JavaScript, React

https://paulosplitbill.netlify.app/

The Split Bill application. The app efficiently handles the fair division of expenses within a group. Users can simply select options, input financial details, and designate payers, with the app instantly calculating and displaying the outcome. Additionally, a user-friendly 'Add Friend' feature allows for the inclusion of new participants in the bill-splitting process.

TRAVEL LIST APP
HTML, CSS, JavaScript, React

https://paulosplitbill.netlify.app

Travel List application. This app allows users to specify the quantity and type of items, automatically adding them to a list below. The checkbox feature enables users to mark items as packed, providing visual cues for the packing progress.
the application also offers functionalities such as clearing the entire list and sorting items based on user preferences and a nice message at the bottom of the page for a positive touch.

BANKIST WEBSITE
HTML, CSS, JavaScript

https://pvmello.github.io/bankistweb/

User-friendly website inspired by real bank websites, providing a nice browsing experience. The intuitive navigation bar allows users to explore different sections, with direct links guiding them to specific content. The carousel at the end adds a visually appealing touch, enhancing user engagement.

MEMORY GAME
HTML, CSS, JavaScript, React

https://paulo-memorygame-app.netlify.app

Memory game using the React framework. This application tests users' memory skills by presenting them with a series of cards that they must match in pairs. It is designed to provide an engaging and interactive experience. The game utilizes React's efficient rendering and state management capabilities to ensure smooth gameplay and an intuitive user interface.

DICE GAME
HTML, CSS, JavaScript

https://pvmello.github.io/dicegame-/

Dice Game. The objective is to accumulate 20 points by rolling the die, but beware – rolling a 0 results in a missed turn. Players can decide whether to hold their current score or pass the die to the other player for a roll. The first to reach 20 points wins, and a lively animation showcases the results.
